Bug Reporting

1. The user with insufficient leave balance must not be able to apply for leave

Precondition:
   ● User must be login with valid credentials
   ● User must land on home page
Steps to Replicate
   1. Navigate to leave
   2. Click on apply
   3. Enter mandatory details
   4. Click on apply button
Current Behavior
   ● Validation message "Balance not sufficient" is displayed but leave applied is accepted with insufficient leave balance
Expected Behavior
   ● User leave request with insufficient leave balance should not be accepted after clicking on apply button

2. The user must be notified before assigning leave to the same employee

Precondition:
   ● User must be login with valid credentials

● User must land on home page

Steps to Replicate
1. Navigate to leave
2. Click on Assign Leave
3. Enter mandatory details of employee whose leave is already assigned
4. Click on Assign button

Current Behavior
● The overlapped details of an employee are accepted and "Success" message is displayed

Expected Behavior
● Validation message about leave request being overlapped should be displayed instead of "Success" message after clicking on the assign button

3.The candidates resume must be downloadable

Precondition:
● User must be login with valid credentials
● User must land on home page

Steps to Replicate
1. Navigate to recruitment
2. Click on candidates then scroll down to record found list
3. Select the candidates from the list then click on download icon

Current Behavior
● The candidate resume is not being downloaded after clicking on the download icon,it doesn't seem to be working.

Expected Behavior
● While clicking on the download icon, the candidate resume must be downloaded

4.The created vacancy must be recorded and displayed in the record found list

Precondition:
● User must be login with valid credentials
● User must land on home page

Steps to Replicate
1. Navigate to Recruitment
2. Click on Vacancies then +Add button
3. Enter valid details on the mandatory fields
4. Click on save button

Current Behavior
● The vacancy is created with a success message but is not being displayed on the vacancy record list

Expected Behavior
● After clicking on the save button the new vacancy must be created and it should be displayed on the vacancies record found list with the details mentioned

5.The employee's added log for their performance must be saved and displayed

Precondition:
- User must be login with valid credentials
- User must land on home page

Steps to Replicate
1. Navigate to Performance
2. Click on MyTracker then +Add Log button
3. Enter the valid details
4. Click on save button

Current Behavior
- The added log by the employee is not being displayed after clicking on the save button

Expected Behavior
- Entered details must be displayed with validation message"Success" while clicking on the save button

6. The user must be able to assign multiple reviewer on the reviewer field

Precondition:
- User must be login with valid credentials
- User must land on home page

Steps to Replicate
1. Navigate to Performance
2. Click on Configure then select Tracker
3. Click on +Add button
4. Enter the valid reviewers name on the reviewers field

Current Behavior
- Only one reviewer name can be added on the reviewers field, it doesn't show the option to add other reviewers name

Expected Behavior
- Users must be able to enter multiple valid reviewers' names on the reviewers field which must be displayed and assigned reviewers must be notified through emails after clicking on the save button.
